Ahmad Industries is committed as a team with a vision to be recognized as the leader in the field of our expertise in manufacturing that exceeds our customer's satisfaction.

To achieve this goal we will provide technical information, training, tools & skills to each of our associate to motivate them in achieving the targets Empowering each employee so that each and every one of us is responsible and accountable for the fulfillment of our goal of quality beyond excellence

Best possible feedback from customers and its timely interpretation and development of remedies will be the base line for all future developments

Our Mold manufacturing section provides state of the art molds for various industries for plastic injection molding.

We are conveniently located in Al-Jurf Industrial Area, with ample space and infrastructure to stock and supply the filtration products to anywhere in United Arab Emirates.

We provide products conforming to governing standard and of consistent quality which help us stand out in all our operations to achieve customer satisfaction for sales and services. Our team firmly believes in sharing information of the products and other extremely important details, necessary for the community and for our respected dealers.

Ahmad Industries LLC has a diversified business. Our core business involves Sheet Metal cutting and sleeting. We provide Sheet Metal of highest quality.

Precision customized molds for all plastic injection molding machines

Design Conceptualization

Product engineers make the 3D model design according to your idea

Prototyping

After confirmed the 3D model, Some complex product will make prototype to verify the assembly and function

Mold Design

After verifying the prototype, our mold engineer will do DFM report, Mold Flow and the mold design

Injection Mold Making

After the 3D design of the mold confirmed, the injection mold maker will starts the injection mold making

Mold Repairs

Some products require assembly and packaging services according to customer requirements

Mold Manufacturing

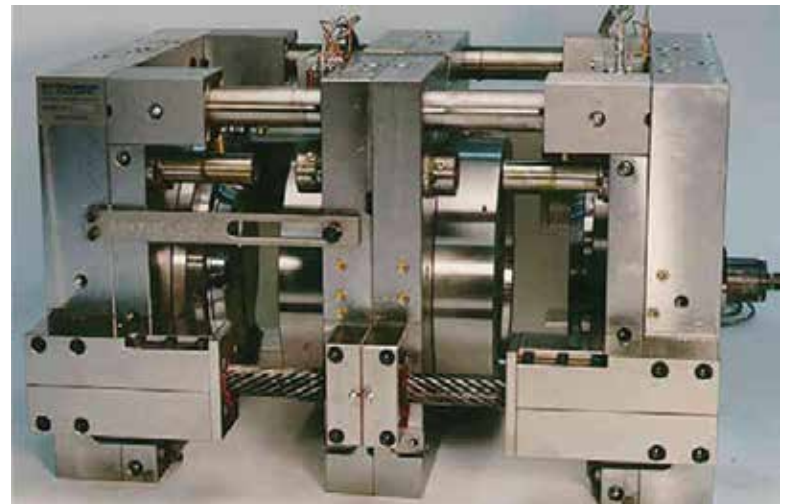

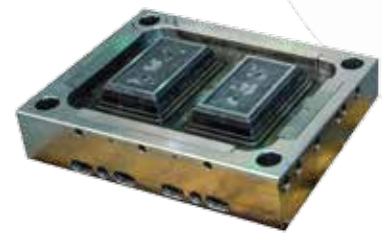

We have most modern machines imported from the best industrial suppliers with the sole purpose of providing the highest quality of products to our customers.

These are precision machines which are renowned around the world for their effective and efficient controls in the manufacturing of precision products.

Our stringent quality standards ensure we consistently meet and exceed our customer's expectations.

Together, with our advanced machining capabilities, we are able to produce the highest quality molds.

3-Axis High Speed Linear
Drive Die Sinker E.D.M

Highly rigid column moving structure design attached with X ' Y ' Z axis
Linear Motors to gain high speed, backlash-free, high precision machining.

AgieCharmilles CUT P Pro serie machine

New generation of Energy Efficient
Wire-Cutting machine

Vertical Milling Center

We have a very unique suite of seasoned and
enthusiastic team members. That ensure high-
precision end product from its inception to
finishing.

The new benchmark in universal turning
By DMG Mori

Precision in Manufacturing

We immensely value our customer's business needs. We always strive to deliver cost-effective excellent quality products in timely manners. We believe it is our success if our customer's business excels because of us.

- Custom plastic injection moulds
- Multi-cavity moulds
- High precision moulds
- Insert moulds
- Two-shot moulds
- Unscrewing moulds
- Gas-assisted moulds
- Die casting moulds
- Porototype mould and low cycle moulds
- Gas assist moulding
- Elastomeric moulding
- IML & IMD
- Thin wall mould
- High temperature mould
- Foam injection mould

When anyone reach out to us to acquire our services, we inquire customers' requirements and propose them the best options. After approval, a dedicated team consisting of designers, engineers, technicians and QC experts starts immediately working on the project. They ensure quality productions in timely manners.
